NEW QUESTION 1

- (Exam Topic 1)

A company uses Dynamics 365 Sales. The company uses a browser-based app named Sales Hub. You need ensure that users can access data from mobile devices.

Which app should users install?

- A. Dynamics 365 Remote Assist
- B. Dynamics 365 Finance
- C. Dynamics 365 Business Central
- D. Dynamics 365 for Phones

Answer: D

Explanation:

Use the Dynamics 365 for phones and Dynamics 365 for tablets apps for your sales, customer service, field service, and other tasks when you're on the go. With one download from your app store, you'll automatically have access to all the apps you need for your role. You will see apps with the new Unified Interface on your mobile device.

NEW QUESTION 2

- (Exam Topic 1)

You are a customer service manager.

You need to implement a Power Apps portal that allows customers to submit cases. Which type of data source is used?

- A. Dynamics 365 Connector
- B. Microsoft SharePoint
- C. Microsoft Azure Storage
- D. Common Data Service

Answer: B

Explanation:

SharePoint can be set up to setup customer feedback.

Note: The PowerApp uses Finance and Operations connector to grab sales order information and SharePoint connector to connect and write the data to SharePoint list.

NEW QUESTION 5

- (Exam Topic 2)

A coworker is creating an app in Power Apps and needs to automatically synchronize data from an external source. The coworker is unable to locate a suitable Microsoft approved connector template in AppSource.

You need to recommend a solution for the coworker. What should you recommend?

- A. Create a custom connector.
B. Ask the outside source to send you the data once a week.
C. Use Microsoft Flow to connect to the database.
D. Open a ticket with Microsoft and request a new connector.
E. Use Microsoft Azure Service Bus.

Answer: A

Explanation:

There are 250 + predefined connectors that you can use in your PowerApps and in your Microsoft Flows. If you do not find any that suits your needs you have the possibility to create a Custom Connector.

Note: A Custom Connector is a wrapper around a REST API (Logic Apps also supports SOAP APIs) that allows Logic Apps, Microsoft Flow, or PowerApps to communicate with that REST or SOAP API.

NEW QUESTION 6

- (Exam Topic 2)

A company plans to implement solutions that use Common Data Service as a data storage. You need to recommend features to meet the company's needs. Which features should you recommend? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Features | Answer Area | |
|------------------------|---|---------|
| | Requirement | Feature |
| business rules | Validate data across multiple fields and entities regardless of the app used to create data. Create visual guides to ensure that users enter data and perform tasks in a consistent manner. Accelerate development by using a standard set of entities for the most common scenarios. | Feature |
| business process flows | | Feature |
| Common Data Model | | Feature |

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: business rules

You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.

Box 2: business process flows

Flows Power Automate includes several types of processes, each designed for a different purpose:

- Automated flows. Create a flow that performs one or more tasks automatically after it's triggered by an event.
- Button flows. Perform repetitive tasks simply by tapping a button on your mobile device.
- Scheduled flows. Create a flow that performs one or more tasks on a schedule such as once a day, on a specific date, or after a certain time.
- Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.
- Workflows and actions. Dynamics 365 customizers may be familiar with the classic Common Data Service processes, which are workflows and actions.

Box 3: Common Data Model

Model-driven app design is a component-focused approach to app development. Model-driven app design doesn't require code and the apps you make can be simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model-driven apps much of the layout is determined for you and largely designated by the components you add to the app.

NEW QUESTION 10

- (Exam Topic 3)

A company needs to create a series of mobile applications to empower their field engineers to accomplish several tasks with varying degrees of complexity.

Match each option to its answer.

Instructions: To answer, drag the appropriate app type from the column on the left to its definition on the right. Each app type may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

| App types | Answer Area |
|--------------|--|
| | DefinitionApp type |
| model-driven | |
| dashboard | Quickly create apps for very complex business processes with very little or no code. |
| dataset | |
| canvas | Create simple apps with a highly customizable user interface layouts. |

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: canvas

Both model-driven and canvas apps allow you to easily build business apps. They both share access to the Common Data Service providing standard and custom entities. Canvas apps start with your user experience, crafting a highly tailored interface with the power of a blank canvas and connecting it to 200 data sources. Canvas apps can be built for web, mobile, and tablet applications. Model-driven apps start with your data model – building up from the shape of your core business data and processes in the Common Data Service to model forms, views, and other components. Model-driven apps automatically generate great UI that is responsive across devices.

NEW QUESTION 22

- (Exam Topic 3)

A company runs a call center to handle customer support inquiries.

The company tracks metrics including the number of incoming calls, call resolution rates, and escalations. The company wants to display the metrics on a shared screen that is visible to all call center staff.

You need to recommend a solution for the company. Which Power Platform feature should you recommend?

- A. AI Builder
- B. Power Automate
- C. Power Apps
- D. Power BI

Answer: D

NEW QUESTION 27

- (Exam Topic 3)

A company plans to implement Power BI to analyze retail operations data. You need to recommend solutions for the company.

Which Power BI components should the company use? To answer, drag the appropriate Power BI components

to the correct requirements. Each Power BI component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Power BI components | Requirement | Power BI component |

NEW QUESTION 29

- (Exam Topic 3)

This question requires that you evaluate the BOLD text to determine if it is correct.

You have a Power BI report with a page named RevReceived. The page shows revenue received by your company. You want to create an almost identical page that shows net revenue instead of gross revenue. To accomplish this task, you modify the RevReceived page.

Review the underlined text. If it makes the statement correct, "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.

- B. duplicate the RevReceived page.
- C. import the RevReceived page.
- D. copy the visuals from RevReceived to a new page.

Answer: B

NEW QUESTION 34

- (Exam Topic 3)

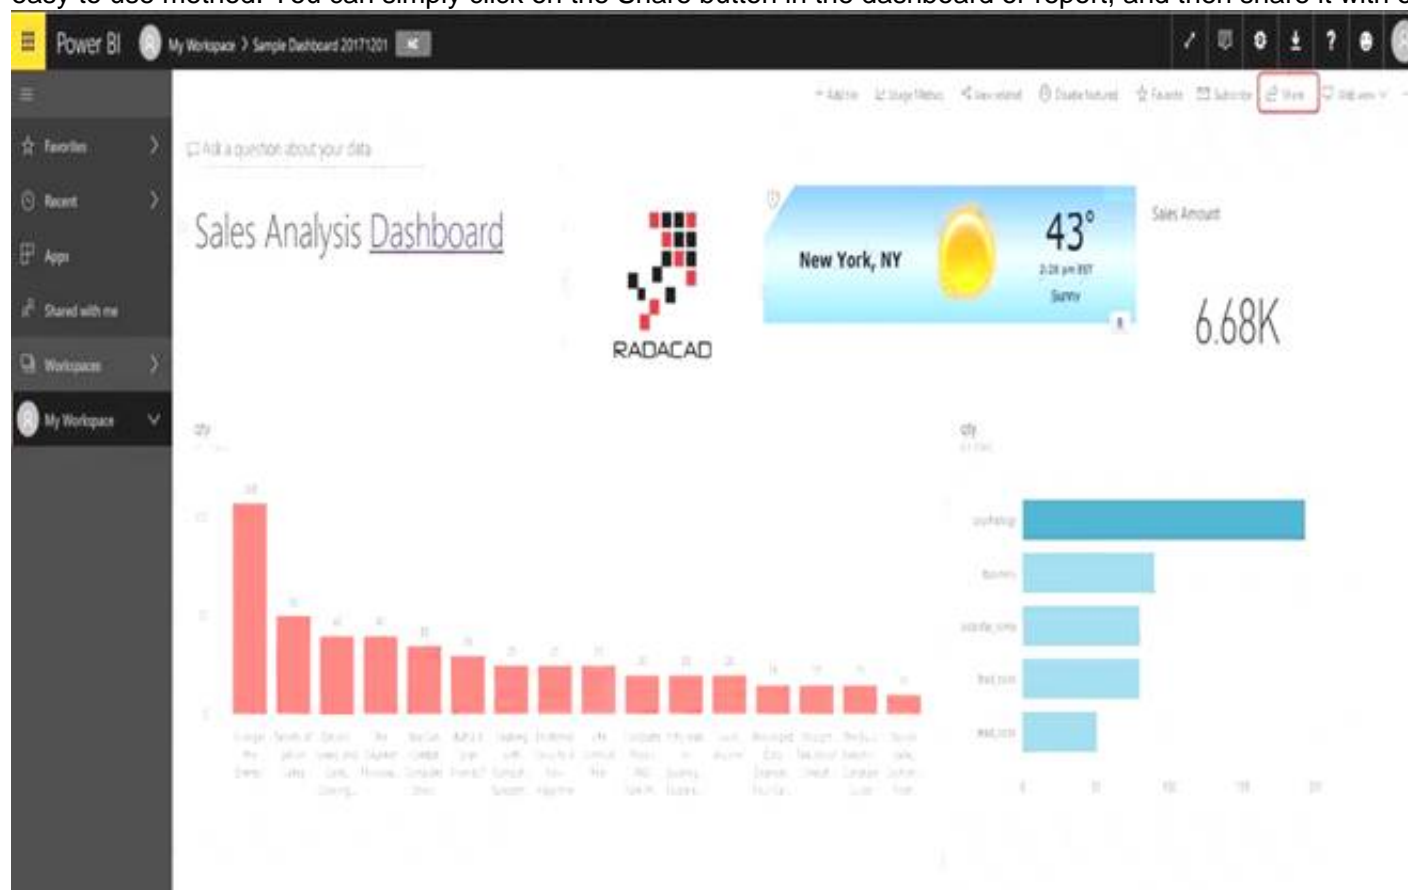

You create a Power BI dashboard that displays data from Dynamics 365 Customer Engagement. You need to share the Power BI dashboard with coworkers. What are three possible ways to achieve the goal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Create a Power BI workspace and grant coworkers permissions.
- B. Publish the dashboard as an app to your coworkers.
- C. Export the data into Common Data Service for others to manipulate in Power BI.
- D. Export the data to Microsoft Excel for coworkers to import and view in Power BI.
- E. Embed reports in your company's internal web portal.

Answer: ABE

Explanation:

A: Basic Sharing for Dashboards and Reports through a workspace is the most common way of sharing the Power BI content. Basic Sharing is very simple and easy to use method. You can simply click on the Share button in the dashboard or report, and then share it with other users.

B: Apps are great sharing method for multiple environment, and best way of sharing for users in production environment.

Power BI App is the solution for multiple environment approach. With Power BI App, your development environment (workspace), and user environment (App) are isolated from each other.

Note: If you are using SharePoint online as a portal for document management and some other reasons already, then consider using Embed in SharePoint Online feature of Power BI reports. This method is secure and you can share the report only with Power BI users you want.

E: Sometimes, you don't need a secure way of sharing, you may search for an easy and free way of sharing, and your content is not confidential or sensitive.

Publish to web is your friend in such situation. This is the only free way of sharing in Power BI, but be aware that this method is not secure.

Publish to web method, gives you an embed code, which you can use in any web pages to embed the Power BI report in it

NEW QUESTION 60

- (Exam Topic 4)
A user is trying to understand the differences between the various ways apps can be built by using Power Apps.
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

| Statement | Yes | No |
|---|-----------------------|-----------------------|
| You can embed canvas apps in model-driven apps. | <input type="radio"/> | <input type="radio"/> |
| A Power Apps portal can use only one data source. | <input type="radio"/> | <input type="radio"/> |
| You must use Power BI to create reports in model-driven apps. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Box 1: Yes
You can create a canvas app and then embed that within a model driven app. Box 2: No
With the capability to build a portal in PowerApps, you can create a website for external and internal users enabling them to interact with data stored in Common Data Service.
Note: Common Data Service lets you securely store and manage data that's used by business applications. Data within Common Data Service is stored within a set of entities. An entity is a set of records used to store data, similar to how a table stores data within a database. Common Data Service includes a base set of standard entities that cover typical scenarios, but you can also create custom entities specific to your organization and populate them with data using Power Query. App makers can then use PowerApps to build rich applications using this data.
Box 3: Yes
To get started building a report you'll need the latest version of Power BI Desktop and a PowerApps environment with the latest version of the Common Data

Service.
